### **DETAILED ACTION**

Claims 1-15 are currently pending in the instant application.

#### **I. *Priority***

The instant application is a 371 of PCT/JP04/14368, filed on September 30, 2004 and claims benefit of Foreign Application JAPAN 2003-415398, filed on December 12, 2003.

#### **II. *Information Disclosure Statement***

The information disclosure statements (IDS) submitted on June 12, 2006, June 26, 2008 and August 12, 2008 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements have been partially considered by the examiner.

#### **III. *Restriction/Election***

##### **A. *Election: Applicant's Response***

Applicants' election without traverse of Group I in the reply filed on July 25, 2008 is acknowledged.

Subject matter not encompassed by elected Group I are withdrawn from further consideration pursuant to 37 CFR 1.142 (b), as being drawn to nonelected inventions.

#### **IV. Rejections**

##### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the steps disclosed on page 8 in the specification. For example, a) compound 1 is reacted with XCl to form compound 2, b) compound 2 is reacted with cyanating agent to form compound 3 and c) the step present in the claim.

#### **V. Objections**

##### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The

Art Unit: 1626

disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the abstract has two paragraphs. Correction is required. See MPEP § 608.01(b).
